Vision

SES Group is committed to realising the vision of creating a successful, recognised, and sustainable Security & Event Management Company with a clear commitment to the professionalisation of its workforce.

Operation London Bridge

Following the death of Her Majesty Queen Elizabeth II on 8th September, SES Group began 10 days of round the clock operations involving planning, mobilising, deploying and delivering, while the Country was in mourning, leading up to the State Funeral on 19th September. We are proud to say that every event, every day was delivered, to a high standard under pressurised circumstances. We were determined to do Her Majesty proud and we hope we achieved this.

We would like to place on record our overwhelming thanks and appreciation to everyone involved in making it possible. Every Company, every member of staff, you all had a part to play and we are very grateful for your support and commitment. Our Sister Company SES Aviation have also had a busy time welcoming Royalty & Foreign Dignitaries from around the world. Tremendous thanks to everyone involved again for ensuring that the day ran as smoothly as possible..

Her Majesty The Queen will now rest for eternity in the King George VI Memorial Chapel alongside her husband Prince Phillip.

Long Live The King.

Drugs & Alcohol

- Alcohol is a depressant drug that affects parts of your brain. You need all your brain functions when working on site.
- If you are found to be intoxicated you will not be allowed on site and may lose your job.
- Alcohol takes time to work out of your system (1 pint of beer takes 2 hours). Heavy drinking the night before may mean you are still under the effects the next day.
- 50% of all drivers killed are over the limit.
- If you know someone who is drunk or on drugs, tell your supervisor - you may save their life and yours.
- Drugs and alcohol will affect your ability to work safely.
- If you are offered drugs, say no. Work safely.
- Drugs, alcohol and work do not mix - do not let it become a problem.

Drugs cause the following:

- Slow reaction times.
- Clumsiness.
- Poor decision-making.
- Distorted vision.
- You are far more likely to have an accident on site when under the influence of drugs or alcohol.
- Random testing for drugs and alcohol is carried out.
